## Internship and Experience

### BackEnd Developer

Jun 2022 - Present

Carlos Tannous, Adma

- Worked on building an application using NodeJS and Express
- Created REST APIs using Thunder Client
- Connected my application to MongoDB, used queries and aggregation pipelines to retrieve data
- Used .env file to hide sensitive data
- Added authorization and authentication using JWT to verify the user using payload, signature, and encryption
- Used access and refresh tokens so that the user when logging in, can change the password, create, read, update, and delete his own information
- Validate data using Joi
- Added an error handling middleware and utility functions for refactoring
- Deployed my application using Heroku.

### .Net Developer

Feb 2020 - Aug 2020

Mark Khadij, Jal El Dib

- Built a car system application using Blazor, MVC, HTML and CSS, Bootstrap, and SQL Server

### Web Developer

Jun 2018 - Aug 2018

Jad Moussa, Jdeideh

- Built a university application using APIs, C#, and SQL Server

### Senior Project

- Built a Blood Donation Website using PHP, Laravel, and MySQL
- Created donor's and recipient's pages, and the quantity that the donor would want to donate
- Created a request page in which all the recipients need a Blood request
- Provided an emailer for the recipient that the donor donated the requested amount specified by the recipient.

## Certificates

Bachelor Degree in Computer Science

Dec 2019

Lebanese Baccalaurate II

Jun 2015

## Personal details

Date of birth

December 1st, 1996

Gender

Male

Nationality

Lebanese
